EDUCATION

California Polytechnic State University (Cal Poly)

M.S. in Business Analytics

San Luis Obispo, CA

**Expected Graduation:
June 2027**

B.S. in Statistics, Cum Laude, June 2026; Minor in Dance

Relevant Coursework: Strategic Marketing Analytics, Mathematical Statistics, Multivariate Statistics

SKILLS

Technical: Python, R/RStudio, SAS, JMP, Excel, SQL

ANALYTICS EXPERIENCE

Frost Research Fellow | R/RStudio

Cal Poly

San Luis Obispo, CA

June - Present

- Collaborated on a three-person research team to refine a qualitative coding scheme for analyzing cognitive thinking in student transcripts, increasing interrater agreement from approximately 80% to 95%.
- Performed multiple linear regression analyses on a dataset of 80 student transcripts to evaluate relationships between coded cognitive indicators and final assessment scores.
- Applied log transformations and assessed model assumptions to improve the validity and reliability of regression analyses.
- Authored a comprehensive technical report and contributed to an oral presentation and research poster presented to the Cal Poly Statistics Department and undergraduate researchers.

Graduate Student Assistant | Python, R

Cal Poly

San Luis Obispo, CA

2026 - Present

- Supported 30+ graduate students across Statistics, Econometrics, and Machine Learning
- Led 2 in-person and virtual study sessions per week, providing group and individualized support to strengthen understanding of quantitative problem-solving and application of statistical methods.
- Partnered with faculty on research, teaching preparation, and course support, applying statistical expertise to academic projects and undergraduate instruction.

Statistical Consultant | R/RStudio, SAS

Senior Project, Cal Poly

San Luis Obispo, CA

March - June 2026

- Consulted with graduate student and faculty clients across 3 research projects to understand research objectives, refine research questions, and recommend appropriate statistical methodologies.
 - Redesigned an underpowered experimental study to increase projected statistical power from 13% to 90%, improving the ability to detect meaningful effects while working within the client's resource constraints.
 - Analyzed data from a longitudinal study of approximately 150 mother-infant pairs to investigate how early feeding practices relate to infant development, identifying an unexpected relationship between feeding method and infants' responsiveness to hunger and fullness cues.
 - Collaborated in teams of 3-4 consultants to diagnose study-design and analytical challenges, evaluate alternative approaches, and communicate recommendations directly to research clients.
-

CAMPUS INVOLVEMENT

Company Member and Dancer

Orchesis Dance Company, Cal Poly

San Luis Obispo, CA

Sept 2022-Present

- Selected through a competitive audition process among 60+ dancers to join Cal Poly's 30-member Orchesis Dance Company, demonstrating technical proficiency, artistry, and performance ability.
- Performed in 6 full-scale dance productions for audiences of 300+ attendees, contributing to high-quality performances through technical precision and artistic expression.
- Contributed creative input through improvisation and choreographic development, helping refine movement sequences and enhance the artistic vision of performances.
